NOTES TO THE FINANCIAL STATEMENTS

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business: Original Sixteen to One Mine, Inc. (the Company) incorporated in 1911, actively operates the Sixteen to One mine in Alleghany, California.

Fixed Assets: Fixed assets are stated at historical cost. Depreciation is calculated using straight-line and accelerated methods over the following useful lives: Vehicles 3 to 5 years, Equipment 5 to 7 years, Buildings 18 to 31.5 years.

Depletion Policy: Because of the geological formation in the Alleghany Mining District, estimates of proven reserves cannot be calculated, and accordingly, a cost per unit depletion factor cannot be determined. No depletion deduction is recorded.

Revenue Recognition: New production of gold is recorded as an asset at the current spot price (.999 fine purity). For income tax purposes revenues are not recognized until the gold is sold.

GENERAL NOTES

1. In accordance with directive from the Securities and Exchange Commission (SEC) and Industry Guide 7, reference for all intent and purposes to the Company's employees as miners, its properties as mines or its operation as mining does not diminish the fact that the Company has no proven reserves for the period. The "exploration state" as defined in Guide 7(a)(4)(iii) may apply.

2. Financial statements contain adjustments necessary to present fairly the Company's financial position at June 30, 2023 and December 31, 2022. The results of operations and cash flows for the second quarter of 2023 and 2022 are reported. Financial statements are prepared in accordance with Generally Accepted Accounting Principles for interim financial information and with instructions to Form 10-Q and Item 310(b) of Regulation S-B.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF PLAN OF OPERATION

The Sixteen to One mine requires an unfamiliar operation, which is recognized by its owners, miners, geologists, engineers, and some public agencies. The Company celebrated its 100th year anniversary on Oct. 9, 2011, becoming the oldest gold mining corporation in the United States. Production is approximately 1,500,000 ounces of gold.

Thirty miles of horizontal workings and millions of cubic feet of vertical excavations called stopes exist. Once an area is targeted, travel ways and escape routes are brought into safety compliance. Production miners set up a heading and begin a drill-blast-muck sequence into the quartz. Gold is hosted in the quartz vein. Metal detectors are regularly used underground as a tool for guiding the direction of the work and to classify the ore underground, thereby reducing costs.

Production is termed as "feast or famine". When operations detect the presence of gold, the Company evaluates the environment and changes from exploration to development into production.

FINANCIAL REPORT NOTES:

No value is recorded on the balance sheet for standing timber. No value is recorded on the balance sheet for water-rights. Reduced value is recorded on the balance sheet for buildings, equipment and land. No value is recorded on the balance sheet for goodwill.

For the six-month period ended June 30, 2023, compared to December 31, 2022, there were no significant changes to the balance sheet.

For the six-month period ended June 30, 2023, compared to the same period in 2022, total operating expenses increased by \$20,394 (14%) due to increase in wages and corporate expense.

For the six-month period ended June 30, 2023, compared to the same period in 2022, the company showed a loss of \$106,146 compared to a loss of \$127,723. The \$21,577 (17%) difference is due to an increase in other revenue.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company may make written and oral forward-looking statements about matters that involve risks and uncertainties that may cause actual results to differ from projected results. Important factors that may cause actual results to differ include, among others:

- Fluctuations in the market prices of gold
- General domestic and international economic and political conditions
- Unexpected geological conditions or rock stability conditions.
- Environmental risks
- Changes in laws and government regulations, especially those relating to taxes.
- The availability and timing of permits and approval relating to operations, expansion of operations, and financing of operations
- Fluctuations in interest rates and other adverse financial conditions
- Force majeure events.

ITEM 4: CONTROLS AND PROCEDURES

During gold production, security procedures include multiple levels of gold custody, from the mine to sales. Inventory control procedures were established by a SEC certified auditing firm.

PART II

Item 1 LEGAL PROCEEDINGS

Original Sixteen to One Mine, Inc. on February 28, 2023 filed: Original Complaint: Case No: 2:23-CV-00376-TLN-DB filed in United States District Court, Eastern District of California Sacramento. Plaintiffs: Original Sixteen to One Mine, Inc. et al. Defendants: Quartzview Inc., et al.

Item 1a RISK FACTORS

(a) Price of Gold

The daily spot price of gold has modest financial effect on gross revenue if it's between \$1,700 and \$1,800 an ounce. A drop below \$1,700 may have an adverse effect on the Company's revenue. Closing spot price on June 30, 2023, was \$1,912.25.

(b) Lack of Proven Reserves

A sense of uncertainty is perceived by some. Caution is recommended in using reserves as an economic tool for valuing a mining company. The Company has no ability to measure reserves using the mathematical tools recognized in the mining industry.

(c) Governmental Regulation

The attached financial statements are unaudited. Therefore, the Company is not in full compliance with the SEC regulation for companies listed on an exchange. The Company is in compliance with all known safety and environmental standards and regulations.

(d) Liquidity

A buy market for gold is global and a spot price per ounce is always available.

(e) Price of Stock

Bids and offers are publicly recorded on the stock page of the Company's web site. Exposure is negligible. A per share price offer exists for shareholders listed on the October 2021, shareholder list at \$1.00 per share which expired on March 31, 2023.

Item 2 UNREGISTERED SALES OF EQUITY

None

Item 3. DEFAULTS ON SECURITIES

None

Item 4. MINE SAFETY DISCLOSURES

For the six-month ended June 30, 2023, the Mine Safety Health Administration (MSHA) issued fourteen citations to Quartzview Corp.

Item 5. OTHER INFORMATION

The financial statements are prepared by management in accordance with generally accepted accounting practices. Such rules allow the omission of certain information and footnote disclosures included in financial statements prepared in accordance with generally accepted audited accounting principles as long as the statements are not misleading.

All adjustments necessary for a fair presentation of the interim statements are included. These adjustments are of a normal recurring nature.

Management evaluates its estimates and assumptions; actual amounts may differ. No independent accounting firm or auditors have any responsibility for the accounting and written statements of the Form 10-Q.

The Company and its president assume responsibility for the accuracy of this filing and certify the financial statements present fairly in all material respects, the financial position of Original Sixteen to One Mine, Inc at June 30, 2023.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
